Discussion of upcoming LCAAS events.

March 4 Review lighting & make recommendations at weather service site

March 27 (Saturday) 9:30am 12:00pm at Family Affair in La Crescent.

April 24 Astronomy Day

May 1 Banquet at Hackberries/ Dr. Jennifer Anderson

June 11 KVR

Sept 11 MVC

We're receiving a Night Sky Network toolkit possibly due to presentations we've given.

Business Meeting adjourned at approximately 7:45pm.

Mike R. gave presentation on laser collimation. Highlights were:

1. Make sure the laser itself is aligned. Can be done with simple v-blocks.
2. Make sure the laser collimator is square and secure in the focuser.
3. Primary mirror must be center spotted. Standard reinforcing rings may be big.
4. Adjust secondary first so laser is centered in primary spot.
5. Adjust primary so return beam disappears into center hole in laser collimator.

Program: A Galaxy Full of Black Holes
